

**Lift the value of your home!  
Make your garage the most  
practical, appealing area  
with this new door.**

**ROLLING DOOR  
MANUFACTURING**

A garage door increases the value and appeal of your home. The curb appeal and benefits it provides are important if you remodel or sell.

Our residential rolling doors provide an attractive & modern appearance. Built with durable steel materials and a high quality paint finish which provides reliable protection. The door requires little to no maintenance. Contact us to show you a quick and simple proposal of how this door fits your home.

**Introducing  
RESIDENTIAL ROLLING DOORS**

**Product Approval No.  
FL 14443 – FL 14444 – FL 8344  
(For High Velocity  
Hurricane Zones)**

*Residential rolling door with motor operation, infrared security sensors and custom powder coat paint.*

**rolling-door.com**

# It protects your home and makes your garage more spacious.

## What are the Benefits ?

**Protects your family, belongings, and the structure of your home** from the risk of hurricane speed wind loads. The door is approved and tested by the state of Florida.

**An uncluttered garage.** The residential garage door has an ingenious feature. It opens and closes in it's own box. The small box allows you to keep a clean and uncluttered space. No railings or cables going up your ceiling, just a clean pleasing area. We could advise on some great overhead storage solutions for your new space.

**High quality at a great value.** The steel materials have a galvanized coating and high quality paint finish. Our quality

control procedures are NAMI quality certified. We offer class leading design and efficiency. Our doors are backed by a one year warranty.

**Buy direct from the manufacturer.** Our efficient operations allow us to pass the savings directly on to you. We provide direct support and customer service.

**Lowers your utility bills.** An insulated garage door can keep the heat out and help maintain the internal temperature of your home. We offer our patented insulation system that provides the best in thermal protection. (Tax credit incentives available on insulated doors, ).

Want to see the door in a neighborhood near you? references of homeowners with residential rolling doors are available upon request.

External motor shown.  
Central enclosed motor is standard.

## Customize your New Door!

**Infrared Security Sensors:** Motion sensors detect any movement and prevent the door from coming down. Works great to protect children and pets.

**Colors:** Standard finish is white, but any color can be painted to match. Ask for a color chart.

**Manual:** The door can be opened by hand with a pull handle.

**Chain hoist:** The door can be opened with a chain along the side of the door.

**Motor:** The door can be opened automatically with a remote and keypad unit.

## I want a motor, but how do I open and close the door?

This is a remote that goes on your wall to open the door. The remote can be removed from the base.

This remote opens up to 4 doors at a time.

This small box is the connection between motor and remote.
